KOLLE AND HETSCH

Experimental Bacteriology

BY

DR. W. KOLLE, *Director of the Institute for Experimental Therapy of the Chemicotherapeutical Research Institute "Georg Speyer-Haus," Hon. Professor at the University of Frankfort.*

and

DR. H. HETSCH, *Professor at the Institute for Experimental Therapy, Frankfort.*

In 2 large octavo volumes, 118 color plates
200 text figures — 1200 pages

\$16.00 the set

This famous work is at last available in English. It is translated from the seventh German edition, edited and further revised by John Eyre, F.R.S., Edin., Director of the Bacteriological Department, Guy's Hospital; Professor of Bacteriology, University of London.

The introductory chapters of this important work deal with the morphology and biology of pathogenetic micro-organisms and infection in general. The theories of immunity are considered with particular reference to their practical application in serum- and bacteriotherapy. The major portion of the book is a comprehensive treatise on the pathogenic bacteria and their activities, while a section is added to include the diseases caused by protozoa and fungi.

To Be Published Late Spring

KAPPERS-HUBER-CROSBY

The Comparative Anatomy of the Nervous System of Vertebrates Including Man

In 2 large octavo volumes, profusely illustrated

Probable price \$15.00

This is an adaptation of Ariens Kappers' work entitled "Die vergleichende Anatomie des Nervensystems der Wirbeltiere und des Menschen." It has been thoroughly revised, extensively enlarged in text and many new illustrations have been added.

A new product to prescribe routinely for expectant mothers

Tablets Dicalcium Phosphate Compound with Viosterol
Squibb supply a balanced ratio of the protective minerals
—calcium and phosphorus—plus enough Vitamin D to
aid in their utilization

PHYSICIANS who are prescribing some special source of calcium for mothers during pregnancy will be interested to learn of this new product of Squibb's!

It was developed to meet the greatly increased needs of both mother and baby for additional amounts of the calcium used in bone-and-tooth building. But, instead of supplying calcium alone, it supplies enough phosphorus to maintain a proper balance of the minerals and also enough Vitamin D to help ensure their utilization.

Thus, results with this new product—*Tablets Dicalcium Phosphate Compound with Viosterol Squibb*—may be expected to be more satisfactory than with products supplying calcium alone.

Recent investigations have pointed to the need for more calcium in the diet of most adults, even under normal conditions. Dr. Alice Bernheim studied more than 4,000 unselected cases at the New York Hospital from the point of view of calcium intake and found

that *only two* were satisfactory in this respect. (J.A.M.A. 100:1001, 1933.) Dr. Henry Sherman is another investigator who has long urged a more liberal calcium intake.

If people need more calcium under normal conditions, then surely there must be an even greater need for supplementation of the diet in this important mineral during pregnancy!

Each tablet contains 9 grains Dicalcium Phosphate and 6 grains Calcium gluconate together with 660 U.S.P.X (1934 Revised) units of Vitamin D. The ratio of calcium to phosphorus is 1.625 (calcium 2.6, phosphorus 1.6 grains). Supplied in boxes of 51 tablets.

Patients like the taste of the tablets, flavored with wintergreen. Prescribe their use *routinely* every day.

FREE to physicians: A sample package of Tablets Dicalcium Phosphate Compound with Viosterol Squibb will be sent upon request. Write to E. R. Squibb & Sons, at 745 Fifth Avenue, New York City.

TELLING IT TO THE WORLD

Agarol has told its story of dependability to the medical profession of the world, not in words but in actions. What a good mineral oil emulsion, made of finest ingredients promised in theory, Agarol has performed in practice

That is why Agarol today is accepted as a standard in the treatment of constipation in almost every land of the globe where modern medicine has found its way... With its therapeutic efficiency Agarol combines unusual palatability, unaided by artificial flavoring. Its highly purified ingredients demand no disguise.

AGAROL FOR CONSTIPATION

Agarol is supplied in bottles containing 6, 10 and 16 ounces. The average dose is one tablespoonful. Liberal trial quantities gladly supplied to the medical profession.

Spectacular drainage **OF EXCESS FLUID**

IN cardiovascular disease Salyrgan, used intramuscularly or intravenously, fulfills the double purpose of draining the tissues and stimulating the renal function. One writer has termed it "the most spectacular of diuretics." The action of Salyrgan is exceedingly rapid, and the volume eliminated is often remarkable.

Salyrgan is usually well tolerated. A considerable number of cases are reported in which it has been administered for two, three or five years.

Salyrgan solution (containing 10% of Salyrgan) is supplied in ampules of 1 cc. (boxes of 5 and 100 ampules) and 2 cc. (boxes of 10 and 100 ampules).

Vitamin Simplicity and Dependability

McCollum discovered the growth factor in the B Vitamin group. It is neither in B_1 nor in G (B_2) when each is separated to itself. To even make a growth feeding test for either it is necessary in the case of B_1 also to supply G (B_2), or in testing for G (B_2) to supply B_1 .

Macy, Sure and others discovered the direct relationship of enough of the B Vitamins to lactation and the rearing of the young, working with products containing both B_1 and G (B_2) and, undoubtedly, the other B Vitamin factors.

Biological chemists want ready designations for their research. Some recommend that "Vitamin B" be appropriated for but one of its factors, B_1 . It may be desirable in research. It would be misleading to the physician and the consumer, who turn to authentic literature and find that "Vitamin B," which means the Vitamin B group and not just B_1 , promotes growth, that enough "Vitamin B" is needed for the nursing mother.

The biological chemist and the physician, if he has time, can know that an extract potent in only B_1 must have outside additions of other B Vitamin factors to make growth claims. Why put the physician to this trouble? " B_1 " instead of "Vitamin B" for only the B_1 puts the physician on notice that other Vitamin B factors are missing; also that only B_1 is supplied if only B_1 is desired.

Vitamin additions can easily be made a simple matter for the physician. Properly made and tested cod liver oil supplies the A and D Vitamins, oranges Vitamin C, Vegex is high in all of the present known B Vitamins necessary for normal growth, reproduction and successful rearing of the young.

Its iron (Miner Laboratories) is 100% available which is more than that for the iron of yeast. The salt enzyme autolyzing process frees the B Vitamins, minerals, soluble proteins and other food constituents from the tough little yeast cell and furnishes them in an available, palatable and dependable form for the physician's child and adult diets.

A physician's search for a potent, dependable, easily borne and economical source of Vitamins B_1 and G (B_2) ends when you use Vegex.

Sufficient amounts for clinical use, with special physician's literature, sent on request.

(Lantern Slides)**

—Isadore Rosen, Professor of Dermatology
and Syphilology, New York Post-Graduate
Medical School

March 15: Bronchoscopy, its value in the practice of medicine

—Mervin C. Myerson, Director of Otolaryngology,
Kings County Hospital

March 22: Leukemia — diagnosis and treatment

—Joseph E. Connery, Associate Professor
of Clinical Pathology, University and
Bellevue Hospital Medical College

March 29: Management and treatment of disorders of menstruation and the menopause

—Benjamin P. Watson, Professor of Obstetrics
and Gynecology, College of Physicians
and Surgeons

April 5: Sudden deaths with reference to their prevention (Lantern Slides)

—Harrison S. Martland, Chief Medical Examiner
of Essex County, New Jersey

FOR THE TREATMENT OF SYPHILIS

NOVALLOSAN I. B. I.

Sodium-Methylarsen-Citrobismuthate. Prepared in vials of 2 cc. containing 0.10 Gm. of the salt which is partly dissolved and partly in suspension. Novallosan allows for continued intramuscular therapy of Arsenic and Bismuth without local pain, general reaction, or toxicity. Each box contains six 2 cc. ampoules.

•

BISIACOL I. S. M.

An oily suspension of Bismuth Carbonate, put up in vials of 2.2 cc. containing 0.14 Gm. as Metallic Bismuth. Bisiacol is particularly indicated where there is an intolerance to the arsenicals and the mercurials, and in neurosyphilis. Painless on injection. Each box contains fifty 2.2 cc. ampoules.

•

IOBICHIN I. C. I. (Quinine Iodobismuthate)

A chemical compound of Iodine, Bismuth and Quinine having the appearance of a red amorphous powder. It is marketed in ampoules containing 0.30 Gm. in 5 cc. of oil. Iobichin is the bismuth preparation of choice, especially because of its ease of elimination, thereby avoiding toxicity due to over accumulation.

•

MERCURY BICHLORIDE AMPOULES D. M.

Mercury Bichloride 0.01 Gm. and Sodium Chloride 0.02 Gm. in each cubic centimeter of distilled water. Used in cases where a soluble mercury salt is desired in the treatment of syphilis for rapid therapeutic action. Each box contains eighteen 2 cc. ampoules.

•

MERCURY SALICYLATE AMPOULES D. M.

Ampoules of 10% of Salicylate of Mercury in oil. Indicated in the treatment of syphilis where an insoluble mercury salt is desired. It is slowly absorbed and therefore it is not likely to produce toxic symptoms or salivation.

•

COLLOIDAL MERCURY AMPOULES I. S. M.

Opaque and ash-colored fluid, with each vial containing 0.025 Gm. of metallic Mercury in an extremely finely divided state obtained by electrical methods. Colloidal Mercury is easily absorbed, has fewer local and general reactions, and a greater therapeutic effect due to its colloidal state. Each box contains six 5 cc. ampoules.

DUBIN AMINOPHYLLIN

THEOPHYLLINE-ETHYLENEDIAMINE

VITAMINS

CONTAINED IN BREWERS' YEAST
ARE NECESSARY FOR
NORMAL FUNCTION *of* GASTRIC GLANDS

In experiments by WEBSTER AND ARMOUR on Vitamine-B and gastric secretion, they state: (Proc. Exp. Biol. & Med., Jan. '34) "Administration of powdered brewers' yeast restored the normal secretory activity of the stomach in 3 days. This indicated that for the normal activity of the gastric glands it is necessary that the vitamins contained in yeast, presumably vitamin B complex, be present in the body."

PEMBERTON & OSGOOD
(Chronic Arthritis—
MacMillan & Co., 1934)
state that . . . "there is
general agreement that
lack of vitamin B in
animals leads to, among
other changes, atrophy
of the mucous and mus-
cular layers of the gastro-
intestinal tract . . ."

BREWERS' YEAST-HARRIS

is a remarkably pure culture of brewers' yeast. It is a dry, pasteurized powder, prepared especially for medicinal use that will not ferment in the stomach. It keeps indefinitely at room temperature and is delicious to the taste. It can be taken with regular food, mixed with milk or fruit juice or sprinkled on cereal.

YEAST VITAMINE-HARRIS TABLETS

contain the concentrated Vitamine-B from Brewers' Yeast-Harris. They are small, convenient and contain a known amount of *Vitamine-B complex*. They were the *first* Yeast Vitamine-B tablets made in America and still are the only concentrated Yeast Vitamine-B tablet for clinical use.
